Subject: Re: TSCA Workgroup request for product testing suggestions

Hello,

As a result of my email below, we've had a few calls regarding requests for product testing. There's been some confusion regarding the intent of my email. My point was actually that:

1. We need a clearinghouse of all the products that have been tested by Ecology, EPA, City of Spokane and Spokane County BEFORE we identify additional products to test (note - this is a comprehensive plan element).

I'm requesting that this item be discussed at the text TTWG meeting where members of both the Green Chemistry and TSCA workgroups will be in attendance.

Thanks,
~lisa

Subject: Re: TSCA Workgroup request for product testing suggestions

Hi TSCA Workgroup and Ben,

I wanted to follow up regarding our discussion on product testing last week. I was asked to query the municipalities regarding products in their waste stream that they were interested in having tested as

part of SRRTTF sponsored product testing. The request jogged my memory and in looking back at the SRRTTF notes, we had a similar discussions in the context of the Green Chemistry Workgroup in January and February of 2018. The February 28th, 2018 SRRTTF meeting notes (page 2, Contract Task 3) reports on the conversation. Furthermore, the February 7th, 2018 TTWG meeting notes list some of the products that go into WWTPs and states that the City of Spokane has done some testing on influent. The January 24, 2018 meeting notes (p. 2-3) report on a discussion on product testing on page 3 and also state that Brian Nickel will connect the EPA 'virtual intern' to the Green Chemistry workgroup.

In summary, from the SRRTTF notes:

In February 2018, the SRRTTF decided that there was a need to compile previous product testing results from Ecology, EPA and locally from the City of Spokane and Spokane County before determining what additional testing should be done at the request of SRRTTF members. It was suggested that EPA lead the effort and Brian Nickel said he would coordinate with Michelle Mullin about prior EPA testing and coordinate the Green Chemistry Workgroup's efforts to compile product testing results. It was noted that EPA had a "virtual intern" at the time that was doing a literature review on PCBs and green chemistry and that the intern would be connected to the Green Chemistry Workgroup. The Green Chemistry Workgroup was to continue to address product testing, and Rob Lindsay agreed to participate to represent municipal interests. Michelle Mullin was determined to be the EPA representative on the Green Chemistry workgroup who would help with the product testing efforts. (see additional notes on p2 of Feb 28, 2018 SRRTTF notes). I understand that [REDACTED] Ex. 6 Personal Privacy (PP) so perhaps this is the time to jump start this effort again!

Note that Ecology does have a database of their product testing results, but my understanding is that this is not a 'clearinghouse' that includes product testing from other entities such as EPA, City of Spokane or others. That database can be found at: <https://apps.ecology.wa.gov/ptdbreporting/>

I am not a member of the Green Chemistry Workgroup, so Ben, can you please see that they get this information?

Thanks All,
~lisa

<https://apps.ecology.wa.gov/ptdbreporting/>

This is the link on the Ecology website for product testing. You can search by individual congener, homolog or total PCB. Ben, you can provide this to the Ed and Outreach WG if they don't already know about it.

Subject: TSCA Workgroup Meeting Minutes

Sorry TSCA Workgroup members, but I just realized that I forgot to send you the summary from our most recent meeting held on January 9, 2019 (attached along with supporting documents "TSCA Quick Summary" and "PMF Blank Study Final Report" by Rodenburg regarding silicone). I would appreciate if you could review and provide any comments before our next TSCA Workgroup meeting scheduled for February 6. Please note that our meeting was focused primarily on Tasks #2 and #3 so that should greatly simplify your review (recall that only items in blue are the most recent meeting minutes).

Thanks,

Doug
